PROJECTS

1. **Personal Portfolio Website** - My personal portfolio site, built to showcase my projects, skills, and journey as an IT student.
2. **Chronos: Watch Store Website** - An e-commerce site for a watch brand called Chronos, with a PHP and MySQL backend powering a Bootstrap-based storefront.
3. **Pixel Defense** - The journey starts in a fictional world where a horde of monster trying to push mankind to extinction. Pixel Defense is a standard tower defense game using Pygame. It has unlimited waves with difficulty being scaled up for both weapons and enemies.
4. **APO** - a smart mobile app for medication reminder and elder care. Its core feature is APO, a conversational AI chatbot that speaks to elders. The app also handles schedules, messages, and alerts, with a guardian dashboard for setting reminders and an elder mode that keeps interactions minimal.
